- Allowable ceiling weights are calculated based on the single point recommended tension load of 0.15 kN.
- The eccentric load introduction into the fastener is already considered in these load values.
- Fastening of redundant non-structural components (details see ETA-22/0587).

Stick rate estimation

	Designation	Soft/standard concrete	Tough concrete
	X-SCR M6 ALH32	> 95 %	90–95 %
	X-SCR M8 ALH32		

- The stick rate indicates the percentage of nails that were driven correctly to carry a load.
- Stick rate can vary from the above values depending on job site conditions.
